

Add the AAVA Antimicrobial Stewardship page to your EHRM toolbar

Providing local, facility-specific clinical guidance for common infectious syndromes is a core strategy for hospital antimicrobial stewardship programs. Please utilize the [AAVA Antimicrobial Stewardship SharePoint site](#) for information on local antimicrobial resistance, restricted antimicrobials, and clinical guidelines, **which may not be reflected within the new EHRM**. For easy access, we recommend adding the [AAVA Antimicrobial Stewardship SharePoint site](#) to your EHRM toolbar when you set up your profile.

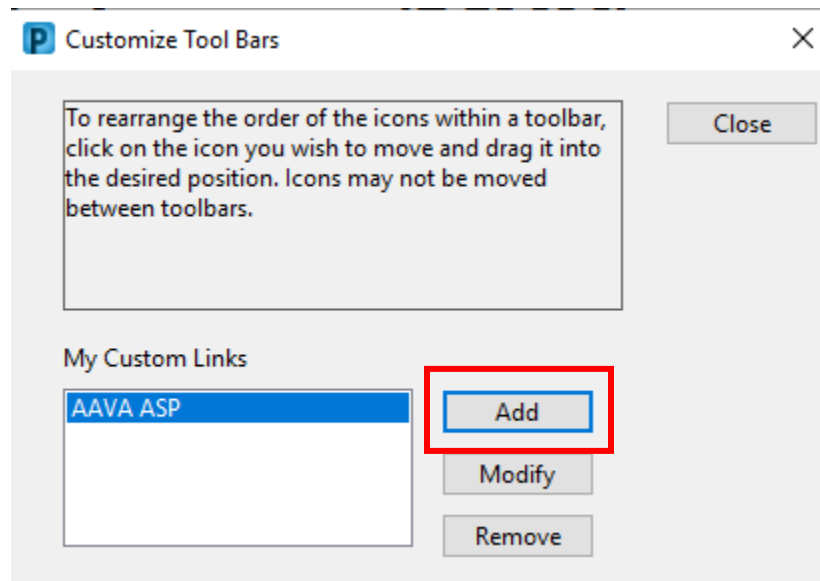

1. From the main page, select the “down arrow” next to the library resources section:

2. Select “add or remove buttons” and “customize”

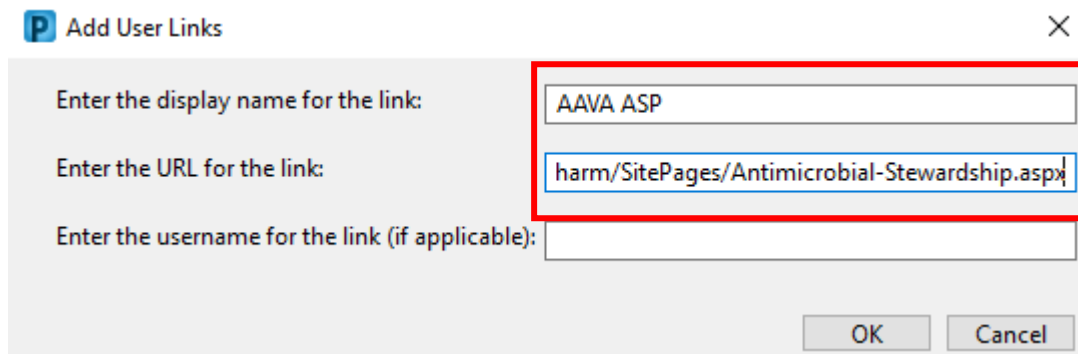

3. Select “add”

4. Enter a name for your link, such as “AAVA ASP” and add the URL for the AAVA ASP SharePoint site:

<https://dvagov.sharepoint.com/sites/vhaannpharm/SitePages/Antimicrobial-Stewardship.aspx>

Add User Links

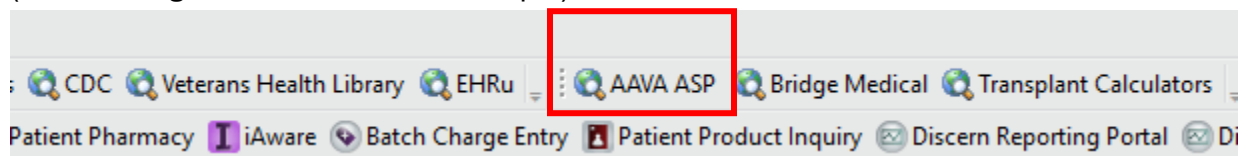

Enter the display name for the link: AAVA ASP

Enter the URL for the link: harm/SitePages/Antimicrobial-Stewardship.aspx

Enter the username for the link (if applicable):

OK Cancel

5. You can drag the icon for your new link to where you would like it to appear on the toolbar when the customize window is open (see wording on the screenshot in step 3):

Please reach out to us anytime with questions:

Infectious Diseases (ID) attendings, ID fellows, and the ID pharmacist are authorized to approve the use of restricted antimicrobials and can provide additional guidance on appropriate antimicrobial selection. The ID fellow can be reached at pager 3010 or office phone 734-845-5806. The ID pharmacist, Dr. Ron Kendall, can be reached at office phone 734-845-5829 or by Microsoft Team message. Dr. Elizabeth Scruggs-Wodkowski can be reached at office phone 734-222-6026, pager 22789, or by Microsoft Team message.
